

INTERNATIONAL COMMISSION FOR THE
CONSERVATION OF ATLANTIC TUNAS

COMMISSION INTERNATIONALE POUR LA
CONSERVATION DES THONIDES DE L'ATLANTIQUE

COMISION INTERNACIONAL PARA LA
CONSERVACION DEL ATUN ATLANTICO

Madrid, le 21 janvier 2025

CIRCULAIRE ICCAT # 00453 / 2025

OBJET : APPEL D'OFFRES - ESTIMATION DE LA MORTALITÉ DÉRIVÉE DU MARQUAGE DES THONIDÉS TROPICAUX

Je souhaite transmettre un appel d'offres pour l'estimation de la mortalité dérivée du marquage des thonidés tropicaux qui sera réalisée dans le cadre du Programme de recherche et de collecte des données pour les thonidés tropicaux (TTRaD), conformément au plan de travail du SCRS pour cette année.

Je vous saurais gré de bien vouloir assurer la diffusion de cet appel d'offres auprès des personnes qualifiées et des institutions susceptibles d'être intéressées.

Veuillez agréer l'expression de ma parfaite considération.

Secrétaire exécutif

Camille Jean Pierre Manel

DISTRIBUTION:

– **Mandataires de la Commission :**

Président de la Commission :

E. Penas Lado

Président du COC :

D. Campbell

Première vice-Présidente :

Z. Driouich

Président du PWG :

N. Ansell

Deuxième vice-Président :

R. Chong

Présidente du STACFAD :

D. Warner-Kramer

Présidents des Sous-commissions 1 à 4

Président du SCRS :

C. Brown

– **Chefs de délégation/Chefs scientifiques**

– **Parties, Entités ou Entités de pêche non contractantes coopérantes**

Pièce jointe : Termes de référence - Estimation de la mortalité dérivée du marquage des thonidés tropicaux (uniquement disponible en anglais).

Terms of reference

Tagging derived mortality estimation of tropical tuna

Background and objectives

The Atlantic Ocean Tropical Tuna Tagging Programme (AOTTP) was a five-year tag and release project implemented by the International Commission for the Conservation of Atlantic Tunas (ICCAT). Five important species of tropical tuna were targeted for tag and release using mainly baitboats, although longliners and recreational anglers were also used. During the project, approximately 120,000 fish were tagged and released with conventional tags. In addition, around 600 with electronic (pop-up and internal/archival) tags were also deployed in bigeye and yellowfin tunas.

The original objectives of the AOTTP were to contribute to food security and economic growth of the Atlantic coastal States by supporting the adoption of appropriate Conservation and Management Measures (CMMs). The AOTTP supported the collection of important tag-recapture, and biological data to improve knowledge of various biological and ecological parameters for the main tropical tuna species in the Atlantic Ocean. Detailed information on the number of fish tagged, years of release and recovery and data availability are provided on the [AOTTP webpage](#) and in **Annex 1**.

This project seeks to utilise tagging data to update natural and fishing mortality estimation for bigeye tuna (*Thunnus obesus*), yellowfin tuna (*Thunnus albacares*) and skipjack tuna (*Katsuwonus pelamis*). Analyses should attempt to account for differences associated with species, area, age/length and year.

Contractor tasks

These Terms of Reference outline the analysis of AOTTP data to estimate fishing and natural mortality for tropical tuna with an initial focus on bigeye tuna ahead of the bigeye tuna data preparatory meeting in 2025.

The tasks include:

- Collate and summarise usable data (supported by the Secretariat);
- Estimate fishing and natural mortality (M) by species, area, age/length and year (where possible) by integrating the multi-year tagging data with information on tag reporting, tag induced mortality and tag shedding rates;
- Consider implications for estimating M of the impact of Fish Aggregating Devices (FADs) on the movement and distribution of tropical tuna stocks;
- Present developments to the Tropical Tuna Species Group;
- Meet as required with the SCRS Tropical Tuna Species Group and incorporate suggestions and updates as required.

Deliverables

1. An SCRS document (and related presentation) describing estimates of bigeye tuna mortality to be submitted by **16 April 2025** and presented at the Bigeye Tuna Data Preparatory Meeting (21-25 April 2025).
2. An SCRS document describing final results for bigeye tuna and preliminary findings for yellowfin tuna and skipjack tuna to be submitted by **9 July 2025** and presented at the Bigeye Tuna Stock Assessment Meeting (14-18 July 2025).

COMISION INTERNACIONAL PARA LA
CONSERVACION DEL ATUN ATLANTICO

3. An SCRS document and related presentation finalising results for all three tropical tuna species to be submitted by **12 September 2025** and presented at the SCRS species group meetings (23-27 September 2025).
4. Provide a final report summarising all results and work completed during the project along with all data and code used before **1 December 2025**.

The Tropical Tunas Species Group, its rapporteur and the SCRS Chair, in consultation with the ICCAT Secretariat, will review all submissions of the contract deliverables and communicate any necessary revisions (if applicable) to the contractor and/or inform of approval within 15 days of the submission(s). The contractor shall submit the revised final documents (if changes are requested) together with the regular invoice, within 30 days after the aforementioned 15 days period.

Contractor minimum qualifications

- Documented multi-year experience in mark-recapture models;
- University degree in one of the following subjects: fisheries science, marine biology, statistics, natural sciences, biological sciences, environmental sciences, or closely related fields (in case of individual scientists);
- Excellent working knowledge of one of the three official languages of ICCAT (English, French or Spanish). A high level of knowledge of English is desirable.

Submission of proposals

The proposals should be developed according to these Terms of reference. The detailed offer shall be submitted only to the attention of Mr Camille Jean Pierre Manel (camille.manel@iccat.int), the Executive Secretary of ICCAT, and Cc'ing Ms. Stasa Tensek (stasa.tensek@iccat.int), by **31 January 2025 (18:00, Madrid time)**, including:

- a) A detailed offer shall include: i) the detailed description of the activities to be carried out; and ii) detailed budget (breakdown), including unitary costs (if applicable).
- b) The *curriculum vitae* of the tenderer (in case of individual scientists) and of any collaborator (sub-contractor).
- c) The *curriculum vitae* of the institution (if an institution is the service provider), with any documented experience in reproductive studies.
- d) The name, address, and telephone number of the tendering person/entity.
- e) The institutional and administrative background of the tendering person/body (e.g. statutes, type of institution, annual budget, budget control procedures, etc. (if applicable)).
- f) A list of any relevant subcontracting activities.
- g) The declaration that the offering person/entity shall follow the ICCAT procedures and formats for data to be provided.
- h) A declaration that all the comments eventually made will be incorporated into the final report prior to submission to the ICCAT Secretariat.
- i) Acknowledgment of this Call for tenders.
- j) A statement specifying the extent of agreement with all the terms, conditions and provisions included in these Terms of reference.

COMISION INTERNACIONAL PARA LA
CONSERVACION DEL ATUN ATLANTICO

Selection of proposal(s)

The ICCAT Secretariat will carry out a review of the offer(s). Contracts will be awarded based on competitive tendering. The evaluation of proposals will be undertaken objectively, consistently and without bias towards particular suppliers. Proposal(s) will be evaluated against a pre-determined set of criteria, which include: i) cost (30%); ii) proven track record (30%); iii) technical merit based on work plan including the bidder's qualifications (30%); and, iv) flexibility to future changes in requirements (10%). As soon as the selection process is completed, the ICCAT Executive Secretary will notify the entity selected for the contract.

Payment details

Disbursement will be made according to the following schedule:

- 30% of the total amount of the contract upon **signing the contract** and after receiving a regular invoice, which may be submitted at the latest 30 days after the signature of the contract;
- 20% of the total amount of the contract upon provision of **Deliverable #2** and after receiving a regular invoice;
- 20% of the total amount of the contract upon provision of **Deliverable #3** and after receiving a regular invoice.
- 30% of the total amount of the contract, after the approval of the final report (**Deliverable #4**), and after receiving a regular invoice and the complete set of the documents concerning the expenses incurred under the contract.

Logistics

All documents provided by the Contractor must be in MS Word or compatible software; tables must be in Excel format or compatible; figures and pictures must be in JPEG or TIFF format or compatible. Tagging data will be included in the ICCAT tagging database. All documents submitted must be in English.

Copyright

All the material produced by the contractor will remain the property of ICCAT, will be kept confidential, and cannot, in any case, be circulated by the contractor. Scientific use of the data by the Contractor will always be notified to ICCAT in advance for clearance.

For further information concerning this Call for tenders, please contact the ICCAT Secretariat at the following address: miguel.santos@iccat.int.

Annex 1

Table 1. Number of fish released, recovered and % recovered by species.

<i>Species</i>	<i>No. released</i>	<i>No. recovered</i>	<i>% recovered</i>
Bigeye tuna (BET)	24092	4941	20.5
Yellowfin tuna (YFT)	40332	8094	20.1
Skipjack tuna (SKJ)	46892	3540	7.5
