COMPENDIUM OF MANAGEMENT RECOMMENDATIONS AND RESOLUTIONS ADOPTED BY ICCAT

Each year, the ICCAT Secretariat produces a “Compendium of the Management Recommendations and Resolutions adopted by ICCAT for the Conservation of Atlantic Tunas and Tuna-Like Species”. The Compendium generally includes the Recommendation and Resolutions that are currently in force (even if only part of a particular measure is still in effect), as well as those that while they may no longer be in force, but have a direct bearing on a current measure. To facilitate the use of this information, the measures are assigned a reference number. The two-digit year code corresponds to the year of adoption by the Commission) (e.g. 94-01, 97-07, 99-11, etc).

In 2003, the Secretariat made a thorough review of all past reports of Commission Meetings to compile a complete historical Compendium of all Recommendations, Resolutions and other major decisions adopted by ICCAT. This has been updated in 2023 to include the measures adopted in 2022 and the deletion of measures that have been superseded.

An interactive version of the full ICCAT Compendium of management decisions is now available on the ICCAT web page that may be consulted on: <https://www.iccat.int/en/RecRes.asp> This version allows users to access Recommendations and Resolutions by category, by year, by status (in force or inactive) or by number.

The Compendium is classified according to major subjects as follows:

Species:

- TRO – BET (Bigeye tuna), YFT (Yellowfin tuna), SKJ (Skipjack tuna)
- SWO (Swordfish)
- ALB (Albacore)
- BFT (Bluefin tuna)
