

Cover sheet to accompany new proposals

(proposal submitted by the European Union)

Title of the Proposed Draft Recommendation/Resolution: *Draft Recommendation by ICCAT to amend the ICCAT Recommendation 22-05 to establish a rebuilding plan for Mediterranean albacore*

Title of currently in force recommendation(s) or resolution(s) addressing the same or related issues: *Recommendation by ICCAT amending the Recommendation 21-06 to establish a rebuilding plan for Mediterranean albacore (Rec. 22-05)*

1. Does it create new **reporting obligation(s)** for CPCs? Yes No

Brief description of new reporting obligation(s):

2. Does it require additional input or **work by the SCRS**? Yes No

Is this work already included in the current SCRS workplan? Yes No

Brief description of new scientific work required (i.e. stock assessment, analysis, external consultant):

By 2026 the SCRS must provide a new Mediterranean albacore stock assessment, assessing the effectiveness of the rebuilding plan, as well as advising the Commission on fishing gear characteristics, the closure period and the minimum size.

3. Does it involve the creation of a **new working group or intersessional process**? Yes No

Intersessional work may be required in the coming years in relation to the Mediterranean albacore stock assessment.

4. Does it require a new **programme or additional activities to be managed by the Secretariat**?

Yes No

Brief description of new Secretariat work required:

This measure aligns to the current bluefin tuna reporting requirements.

5. What is the proposed timeframe for implementation, and are there different specific timeframes for certain CPCs, fisheries, regions, etc.:

Entry into force 2025.

6. Is there any other relevant information regarding the resource and workload implications of the proposal:

The main aim of the proposal is to extend the current measure through to 2025 while also updating the timeline for the continuing SCRS work on Mediterranean albacore. With this proposal the EU is also putting forward an additional provision, 4bis, which aims to better define and further streamline the process of the Mediterranean albacore vessel list.

**Draft Recommendation by ICCAT to amend the ICCAT Recommendation 22-05
to establish a rebuilding plan for Mediterranean albacore**

(proposal submitted by the European Union)

RECALLING the 2021 Recommendation by ICCAT to establish a rebuilding plan for Mediterranean albacore (Rec. 21-06);

NOTING the provisions of ICCAT Recommendation 11-13 and the need to rebuild the stock and to reduce the fishing mortality for stocks overfished and subject to overfishing;

CONSIDERING that the 2021 stock assessment of the Standing Committee on Research and Statistics (SCRS) concluded that the Mediterranean albacore stock is overfished and overfishing is occurring, and recommended a level of catch of 2,500 t to meet the Convention management objective to allow the biomass to recover to the B_{MSY} level with 60% probability by 2034;

ACKNOWLEDGING that following the 2021 Stock Assessment for Mediterranean albacore, the SCRS noted in its advice that there is high uncertainty regarding the characterization of stock status, in particular for fishing mortality;

HIGHLIGHTING that, according to the latest scientific advice, and consistent with the precautionary approach, the SCRS recommends preventing an increase of catches;

CONSIDERING that to prevent an increase of the fishing effort and of catches it is important to ensure that the fishing capacity does not increase;

CONSIDERING that the obligation set out in paragraph 12 of Recommendation by ICCAT replacing the Recommendation 13-04 and establishing a multi-annual recovery plan for Mediterranean swordfish (Rec. 16-05) introducing a closure period from 1 October to 30 November for the longline fisheries targeting Mediterranean albacore (*Thunnus alalunga*), with the aim of protecting juveniles of Mediterranean swordfish (*Xiphias gladius*), should continue to be implemented by all CPCs;

ACKNOWLEDGING that paragraph 11 of ICCAT Recommendation 16-05 on Mediterranean swordfish foresees two alternative closure periods for this fishery and these closures also affect albacore fisheries in the Mediterranean;

ACKNOWLEDGING the socio-economic dimension of small-scale Mediterranean fisheries and the need for a gradual approach and flexibility in managing these fisheries;

RECALLING the importance that all fleets participating in Mediterranean albacore fisheries submit the required data (catch, effort and catch-at-size) on their fisheries for transmission to the SCRS;

CONSIDERING the outcome of the Ad Hoc Working Group on Mediterranean albacore meeting held online on 9-10 February 2022; and

FURTHER CONSIDERING the trilateral discussions between European Union, Egypt and Türkiye at the 2022 ICCAT Annual meeting;

TAKING INTO ACCOUNT that, due to limited data following the adoption of the recovery plan, there is insufficient information available to assess the effectiveness of the current rebuilding plan and for the SCRS to advise on any necessary adjustments;

THE INTERNATIONAL COMMISSION FOR THE CONSERVATION OF
ATLANTIC TUNA (ICCAT) RECOMMENDS THAT:

1. Contracting Parties, Cooperating non-Contracting Parties, Entities or Fishing Entities (hereafter referred to as CPCs) whose vessels have been actively fishing for albacore tuna (*Thunnus alalunga*) in the Mediterranean shall implement a 15-year rebuilding plan starting in 2022 and continuing through 2036 with the goal of achieving B_{MSY} with at least 60% probability.
2. For 2025, a Total Allowable Catch (TAC) shall be set at 2,500 t for albacore tuna (*Thunnus alalunga*) in the Mediterranean.
3. For 2025, the following quotas shall be allocated:

[...]

[...]

<i>CPC</i>	<i>Quota (t)</i>
EU	2,089.93
Egypt	150.27
Libya	23
Morocco	10
Syria	1.8
Türkiye(*)	225
Total	2,500

(*) Türkiye transfers to EU any part of the unused quota up to maximum of 75 t.

4. Each CPC shall limit the number of their fishing vessels authorised to fish for Mediterranean albacore to the number of vessels that were authorized to fish for Mediterranean albacore in 2017 under paragraph 28 of Recommendation 16-05; alternatively, in 2018 for CPCs which started to issue licenses for their fishing vessels in 2018 following the adoption of Recommendation 17-05. The CPCs shall communicate to the Commission, by 15 January 2022, the year of reference applying to them. CPCs, which used 2017 as the year of reference, may apply a tolerance of 10% to this capacity limit.
- 4.bis. At the latest on the 15 March of each year, CPCs shall provide to the ICCAT Secretariat the list of all catching vessels authorized to fish actively for Mediterranean albacore. CPCs shall provide this list according to the format set out in the Guidelines for submitting data and information required by ICCAT. If needed, CPCs shall be able to modify this list during the year by providing an updated list to the ICCAT Secretariat.
5. CPCs shall provide to the ICCAT Secretariat the list of all sport and recreational vessels authorized to catch albacore in the Mediterranean Sea, at least 15 days before the exercise of the activities. Vessels not introduced on this list shall not be authorized to catch Mediterranean albacore.
 6. CPCs shall take the necessary measures to prohibit the catch and retention on board, transshipment or landing of more than three Mediterranean albacore specimens per vessel per day for sport and recreational fisheries.
 7. The marketing of Mediterranean albacore caught in sport and recreational fishing shall be prohibited.
 8. Without prejudice to the obligation set out in paragraph 12 of Recommendation by ICCAT replacing the Recommendation 13-04 and establishing a multi-annual recovery plan for Mediterranean swordfish (Rec. 16-05), Mediterranean albacore shall not be caught (either as a targeted species or as bycatch), retained on board, transhipped or landed during either:

- a) the period from 1 October to 30 November and during an additional period of one month between 15 February and 31 March;
- b) or, alternatively, during the period from 1 January to 31 March each year.

The CPCs shall communicate to the Commission, by 15 January 2022, the closure periods of their choice.

9. CPCs shall monitor the Mediterranean albacore stock and shall submit to the Commission, at least two months before the Annual meeting of the Commission, all relevant scientific information on catch, size and age at maturity, habitat, impact of longline fisheries in terms of catch composition, CPUE series, size distribution of the catches, and monthly estimation of spawner and recruit proportion in the catches. These data shall be submitted to the SCRS in the format required by ICCAT.
10. In 2026, the SCRS shall provide an updated assessment of the state of the stock on the basis of the most recent data available. It shall assess the effectiveness of this rebuilding plan and provide advice on possible amendments to the various measures within this plan. The SCRS shall advise the Commission on the appropriate characteristics of the fishing gear, the closure period in paragraph 8, as well as the minimum size to be implemented for Mediterranean albacore.
11. By the end of 2026, based on this scientific advice, ICCAT shall adopt, where necessary to comply with the management objectives, amendments to the management framework for Mediterranean albacore, including the revision of the catch limits and alternative management scenarios.
12. Notwithstanding the provisions of Article VIII, paragraph 2 of the Convention, CPCs are strongly encouraged to implement, in accordance with their regulatory procedures, this Recommendation as soon as possible and before the date of its entry into force.
13. This Recommendation repeals and replaces the *Recommendation by ICCAT amending the Recommendation 21-06 to establish a rebuilding plan for Mediterranean albacore (Rec. 22-05)*.
