Mediterranean swordfish fishing plans submitted in 2024
Rec. 16-05

Paragraph 10 of the *Recommendation by ICCAT replacing the Recommendation 13-04 and Establishing a Multi-annual Recovery Plan for Mediterranean Swordfish (Rec. 16-05)* states that “Starting in 2018, CPCs shall submit their fishing plan to ICCAT by 15 March each year. Such plan shall include detailed information regarding the quota allocated by gear type, including to sport and recreational fisheries (if applicable) and by-catches”.

Fishing plans were received within the deadline from Algeria, Egypt, European Union, Morocco, Tunisia and Türkiye.

Mediterranean swordfish tuna fishing, inspection and capacity management plans

Algeria

Year of Fishing Plan: 2024

1. Introduction

Algeria's fishing plan for 2024 is based on the provisions of Recommendation 16-05 which remain in force. In accordance with these provisions, in particular, Article 10, the provisions have been implemented into legislation and the national regulation, in particular, the provisions of Law 01-11 on Fisheries and Aquaculture, amended and supplemented, those of Executive Decree No. 03-481 establishing fishing conditions and methods, and the Decisions, in particular, the Decision of 25 February 2018 (Official Gazette No. 17 of 18 March 2018) establishing the swordfish fishery closure period in waters under national jurisdiction.

Algeria implements its fishing plan for 2024 to catch its quota which is around 472.33 t. The authorised national fleet which comprises 515 artisanal vessels with a length between 4 m and 14.3 m, targets swordfish, in accordance with the relevant requirements of Recommendation 16-05 and the national legislation regulating this activity.

A quota of 1%, i.e. 4.7 t has been deducted from the overall quota of 472.33 t and set aside for bycatch and incidental catches.

2. Details of fishing plan

The 2024 Mediterranean swordfish fishing plan seeks to ensure compliance with Algeria's quota limit and the provisions contained in legislation and the national regulation, in particular, those of Law 01-11 on Fisheries and Aquaculture, amended and supplemented, those of Executive Decree No. 03-481 establishing fishing conditions and methods, the Decisions in particular, the Decision of 25 February 2018 establishing the swordfish fishery closure period in waters under national jurisdiction, and in line with the provisions of ICCAT Recommendation 16-05. Like every year, individual quotas for each of the vessels authorised to participate in the swordfish fishery will be established, based on an equitable method of distribution of individual quotas.

For 2024, the swordfish fishing quota will be fished by a fleet of small vessels (boats) comprising 515 artisanal vessels with a size between 4 m and 14.3 m.

These vessels target swordfish in accordance with the current Algerian regulations, an annual fishing authorisation is issued for each vessel by the fisheries administration for the vessels actively fishing for swordfish in 2024. These vessels observe a fishery closure during the regulatory closure period from 1 January to 31 March.

As regards bycatch, catches will be landed, reported and deducted from up to 1% of the Algerian overall quota i.e. 4.7 t, if the bycatch quota is exceeded, the amounts will be deducted from the national quota.

The at-sea control and inspection authority is the National Coast Guard Service which performs the role of fishery policing.

As to fishing ports, in addition to the National Coast Guard Service, monitoring, control and inspection of implementation of fisheries related measures and implementation of measures on fishing activity subject to quotas and ICCAT recommendations are carried out by fishery inspectors. A system is in place to ensure that the amounts of swordfish landed in the designated ports comply with the individual quota allocated to each vessel and the minimum trade size.

	<i>ICCAT requirement (per Rec. 16-05)</i>	<i>Explanation of CPC actions taken to implement</i>	<i>Relevant domestic laws or regulations (as applicable)</i>	<i>Note:</i>
1	Fleet development plan (para 9)	The swordfish fishery in Algeria is a purely artisanal fishery for subsistence purposes, carried out by vessels mostly with a length less than 14 m, with low engine power and with short trips. For the purposes of better monitoring and organization of this type of fishery, the fishery administration closely monitors this artisanal activity for subsistence purposes through decentralised local directorates.	Law No. 15-08 of 2 April 2015 which amends and supplements Law No. 01-11 of 3 July 2001 relating to the fisheries and aquaculture. Executive Decree No.°03-481 of 13 December 2003 establishing the fishing methods, and the applicable Decrees.	
2	Choice of fishery closure periods (para 11-13)	In accordance with paragraphs 11-13, the closure period is established from 1 January to 31 March.	Decree of 25 February 2018 establishing the closure period of the swordfish fishery in waters under national jurisdiction.	
3	Recreational and sports fisheries (para 21-26)	There are no recreational and sport fisheries targeting swordfish in Algeria.		
4	Allocation of by-catch and detail of the limits by vessel/operation (para 30)	Bycatch will be deducted from the balance of the 4.7 t allocated to bycatch or from the Algerian quota if the amount set aside for bycatch is exceeded.		
5	Recording and communication of catches (para 35-37)	Catches (in number and size/weight) are recorded in a logbook as well as in information collection sheets on fishing operations, and entered into the national statistics system. Nonetheless given that it is an artisanal fishery, the longline fleet targeting swordfish comprises vessels with a length less than 15 m, and the exact coordinates of fishing operations are not reported. In accordance with paragraph 37, of ICCAT Rec. 16-05, Algeria reports the volume of Mediterranean swordfish caught by the vessels flying its national flag within 30 days of the end of the period during which the catches were made.	Law 01-11 on fisheries and aquaculture, amended and supplemented. Executive Decree No. 08-181 of 23 June 2008 on the special status of civil servants belonging to the specific bodies of the fisheries administration. Decree of 16-04-2006 establishing the logbook.	
6	Measures taken to control landings (para 34)	As regards control, regular and random controls are carried out by National Coast Guard Service at sea and on each entry at port access points to ensure compliance with	Law 01-11 on fisheries and aquaculture, amended and supplemented.	

	<i>ICCAT requirement (per Rec. 16-05)</i>	<i>Explanation of CPC actions taken to implement</i>	<i>Relevant domestic laws or regulations (as applicable)</i>	<i>Note:</i>
		<p>the regulations in force, in particular, observance of the fishery closure period as well as minimum trade sizes.</p> <p>As regards recording of landings and quota compliance, these tasks are carried out by fishing inspectors deployed in designated landing ports that have been communicated to ICCAT.</p>	<p>Executive Decree No. 08-181 of 23 June 2008 on the special status of civil servants belonging to the specific bodies of the fisheries administration.</p> <p>Decree of 16-04-2006 establishing the logbook.</p>	
7	CPC Scientific Observer (para 44)	<p>This requirement to embark scientific observers on board is difficult to implement as fishing vessels are narrow and do not have decks to enable scientist to board. However, Algeria uses an alternative approach.</p>	<p>No device on board.</p> <p>Executive Decree No. 08-181 of 23 June 2008 on the special status of civil servants belonging to the specific bodies of the fisheries administration.</p>	<p>Alternative measures are used through control on landing of catches and biological samples by fishing inspectors, who are mostly trained biologists, and also by scientific staff members of the CNRDPA, who are deployed at regional stations and communicate and collaborate with the fisheries inspectors.</p>
8	Other requirements (please specify)			

Inspection Plan

a) CPC inspection and control (para 13)

Algeria has introduced a single closure period for the swordfish fishery, from 1 January to 31 March each year. The control and inspection system is summarised as follows:

In addition to at-sea controls, the National Coast Guard Service, as the authority in charge of maritime policing, ensures compliance with implementation of fishing regulations, and carries out control and inspection of fishing activity at port access points.

In parallel, the fisheries inspectors of the Fisheries Administration carry out other controls, while monitoring the landings of fishing products, and in particular, monitoring the amounts landed, and the swordfish fishery closure period to avoid any infringement of the national legislation. This monitoring and control are carried out by the inspectors of the fisheries administration who are duly trained and have experience in control and inspection. These controls are reflected in weekly reports, which are transmitted by the decentralised Fisheries Directorates to the Central Directorate, which is responsible for control and monitoring of fisheries activities.

b) Joint international inspection (para 39-41; Annex 1)

Algeria has an artisanal fleet which operates in waters under national jurisdiction. Therefore, Algeria will not deploy in 2024 a vessel of international joint inspection in international waters.

Capacity management plan (paras 6-10)

Algeria's fishing capacity is represented by a fleet of 515 vessels, that must comply with the quota allocated to Algeria, i.e., 472.33 t. The registered list of recorded vessels targeting swordfish with individual quotas was transmitted to ICCAT on 15 January 2024 (cp01-Vessel_stDZA2024).

SWO-MD Vessel Fleet	Choose one		Total fleet (vessels)				
	Number of vessels in reference period (average 2013-2016)	Number of vessels in reference period (Year 2016)	2020	2021	2022	2023	2024

* Including a vessel 7 m in length.

** 1% of the Algerian quota, i.e., 4.7 t has been set aside for bycatch for 2024.

Egypt

Fishing Plan Year: 2024

1. Introduction

In accordance with the provisions of the *Recommendation by ICCAT replacing the Recommendation 13-04 and establishing a multi-annual recovery plan for Mediterranean swordfish (Rec. 16-05)*, Egypt adopted Resolution No. 291/2023 which sets out the general rules for implementation of the multi-annual recovery plan and applies to the conservation and management plan for Mediterranean swordfish (SWO-MD).

Egypt provides its fishing plan for 2024 for a catch limit of about 100 t for which 1% is deducted as bycatch. The Egyptian fishing vessels catching SWO in the Mediterranean Sea are 7 longline vessels with a length between 12m to 16m with equitable quota for each vessel.

2. Details of fishing plan

Egypt will start 2024 fishing season with 7 longline vessels with a length between 12m to 16m with equitable quota for each vessel. Egypt endorsed Resolution No. 291 / 2023 on the multi-annual recovery plan for Mediterranean swordfish: "No fishing vessel is allowed to fish Mediterranean swordfish either as a targeted species or as bycatch, retain on board, transship, or land without permission from LFRPDA". All SWO catches comply with Recommendation 16-05, taking into account the fishery closure during the regulatory closure period from 1 January to 31 March.

	<i>ICCAT Requirement (per Rec. 16-05)</i>	<i>Explanation of CPC actions taken to implement</i>	<i>Relevant domestic laws or regulations (as applicable)</i>	<i>Note</i>
1.	Fleet development plan (para 9)	Egypt will fish in the 2024 fishing season with seven longline vessels with a length between 12m to 16m.	Resolution No. 291 /2023	
2.	Choice of closed Fishing Seasons (paras 11-13)	The closure of the fishing season is from 1 January to 31 March.	Resolution No. 291 /2023	
3.	Recreational and sports fisheries (paras 21-26)	Egypt prohibits sports and recreational fishing for swordfish.	Resolution No. 291 /2023	
4.	Allocation for bycatch and detail of limit per vessel/operation (para 30)	Egypt deducted 1% of its total catch of SWO-MD (1 t) as bycatch.	Resolution No. 291 /2023	
5.	Catch recording and reporting (paras 35-37)	All vessels communicate, by electronic or other means to LFRPDA weekly information during the whole permitted fishing season to be submitted to ICCAT.	Resolution No. 291 /2023	
6.	Measures taken to control landings (para 34)	All landed catches shall be weighed and inspected based on the allowable quota, fleet size and fishing effort by national inspectors.	Resolution No. 291 /2023	
7.	CPC Scientific Observer (para 44)	All fishing vessels over 15 m targeting SWO are obligated to deploy national scientific observers on at least 5% of its longline vessels.	Resolution No. 291 /2023	
8.	Other requirements (specify)			

Inspection Plan***a) CPC's inspection and control (para 13)***

Egypt prohibits to land any quantity of swordfish fished at any place other than the designated port listed in the ICCAT port list, and in case of landing, all landed catches shall be weighed and inspected based on the allowable quota, fleet size and fishing effort by national inspectors.

The closure of the fishing season is from 1 January to 31 March. All fishing vessels shall ensure full inspection coverage during the 2024 SWO fishing season by LFRPDA inspectors.

b) Joint international inspection (paras 39-41; Annex 1)

Not applicable since we have less than 50 catching vessels engaged in Mediterranean swordfish.

Capacity Management Plan (paras 6-10)

SWO-MD Vessel Fleet	Choose one		Total Fleet (vessels)					
	Number of vessels in reference period (average 2013-2016)	Number of vessels in reference period (year 2016)	2019	2020	2021	2022	2023	2024
Longliner over 40m			0	0	0	0	0	0

Adjusted quota (if applicable)			0	0	0	0		

European Union (EU)

Fishing Plan Year: 2024

1. Introduction

The European Union hereby provides its fishing plan in the context of the multi-annual recovery plan for Mediterranean swordfish (SWO-MD), ICCAT Recommendation 16-05.

The seven EU Member States actively fishing Mediterranean swordfish are Croatia, Cyprus, France, Greece, Italy, Malta and Spain. These EU Member States fish with a range of fishing gears, with a majority of the quotas being attributed to the longline sector. However, catches are also made by more artisanal sectors such as longliners < 12 m, handline and harpoons. The seven EU Member States also cooperate to implement a Joint Deployment Plan of inspections means, in coordination with the European Commission and the European Fisheries Control Agency (EFCA).

The recovery plan for Mediterranean swordfish, ICCAT Recommendation 16-05, has been transposed into European Union (EU) law by way of Regulation (EU) 2019/1154¹.

Furthermore, in 2023 the EU has adopted the revised control Regulation (EU) 2023/2842², which new provisions aim to create a more modern and consistent fisheries control system in the EU and protect marine resources.

2. Details of fishing plan

The European Union Regulation (EU) 2019/1154 defines the closure period for vessels targeting Mediterranean swordfish. In addition, Regulation (EU) No. 2024/257 defines the closure period applicable for vessels targeting Mediterranean albacore.

In accordance with the current Total Allowable Catch (TAC), the quota for the EU in 2024 is fixed in Council Regulation (EU) No. 2024/257 at 6.363,64 t, as it was in 2023.

The EU will continue to submit the lists of authorised vessels that will participate in the fishery in 2024 in accordance with the reporting deadlines laid down under paragraph 27 of Recommendation 16-05.

The EU hereby submits a complementary Inspection plan covering all Mediterranean fisheries, including highly migratory species fisheries, and capable of addressing effectively the control requirements of those fisheries.

The EU undertakes a real-time monitoring of the Mediterranean swordfish fishery and is committed to take the necessary measures to ensure full compliance with ICCAT Recommendation 16-05.

In accordance with ICCAT Recommendation 16-05 the EU has allocated its quota to the following sectors:

¹Regulation (EU) 2019/1154 of the European Parliament and of the Council of 20 June 2019 on a multiannual recovery plan for Mediterranean swordfish.

² Regulation (EU) 2023/2842 of the European Parliament and of the Council of 22 November 2023 amending Council Regulation (EC) No 1224/2009, and amending Council Regulations (EC) No 1967/2006 and (EC) No 1005/2008 and Regulations (EU) 2016/1139, (EU) 2017/2403 and (EU) 2019/473 of the European Parliament and of the Council as regards fisheries control.

<i>Mediterranean vessel fleet</i>	<i>2024</i>
Type	Fleet (No. vessels)
Longliner over 40m	0
Longliner between 24 and 40m	13
Longliner less than 24m	1,466
Total longliners	1,479
Handline	15
Baitboat	0
Harpoon	15
Sport/recreational (Rod & reel)	5,464
Trap	0
Other (polyvalent)	287
Total number of vessels < 7 m	3,793
Total number of vessels > 7 m	3,130
Total fleet/fishing capacity	7,255
Quota (t)	6,364

	<i>ICCAT Requirement (per 16-05)</i>	<i>Explanation of CPC actions taken to implement</i>	<i>Relevant domestic laws or regulations (as applicable)</i>	<i>Note</i>
1	Fleet development plan (para. 9)			Not applicable
2	Choice of closed Fishing Seasons (paras. 11-13)	Period from 1 January to 31 March.	The closure period is inserted in Annex ID of Regulation (EU) 2024/257 of 10 January 2024 and in Art. 10(1) of Regulation (EU) 2019/1154. MS specify the closing season in the terms of the license / authorization.	Within the EU Specific Control and Inspection Programme, inspection missions focus on the verification of compliance with the fishing seasons.
3	Recreational and sports fisheries (paras. 21-26)	Only rod and line is authorised for recreational fishing. All catches are counted against the EU quota. The marketing of Mediterranean swordfish fish caught during sport and recreational fishing is prohibited.	Articles 29 and 30 of Regulation (EU) 2019/1154 establish management and control measures for recreational and sport fisheries. Management of recreational fisheries is under the responsibility of EU Member States. However, the European Commission is informed, upon its request, of measures taken by Member States.	The way these provisions are implemented varies amongst EU Member States, including in some cases total prohibition of sport and recreational fishing activities by certain EU Member States. The limit of one fish per vessel per day shall apply for all recreational vessels.
4	Allocation for by-catch and detail of limit per vessel/operation (para. 30)	The maximum bycatch limit allowed for EU vessels is fixed at 5% per fishing trip and per day or one fish per vessel and per day depending of the EU Member State. Bycatches and discards are counted against the EU quota.		Trawlers and purse-seiners targeting small pelagic species and tuna traps are allowed to catch one specimen of swordfish by trip per day.

5	Catch recording and reporting (paras. 35-37)	EU vessels fully implement the obligation to daily record all catches in the logbook (paper or electronic). All catches of Mediterranean swordfish, including discards (if any) are counted against the EU quota. Cumulative catches are later on reported quarterly to ICCAT, until quota reaches 80% when catches are communicated more frequently.	Art. 33 of Regulation (EU) 2023/2842 and Art. 21 of Regulation (EU) 2019/1154.	
6	Measures taken to control landings (para 34)	Compulsory pre notification before entering into a port.	Art. 17 of Regulation (EU) 2023/2842, and Article 24 of Regulation (EU) 2019/1154 established the obligation of sending a prior notification to the competent authority of the Member State or CPC whose ports or landing facility they intend to use. Based on annual risk assessment, the EU inspections services will include in their national control plans as well in the Specific Control and Inspection Program, benchmarks for inspections at sea, ashore and the commercial chain for SWO-MD fisheries.	Those inspection benchmarks are fixed by Commission Implementing Regulation 2018/1986 ³ .

³ Commission Implementing Decision (EU) 2018/1986 of 13 December 2018 establishing specific control and inspection programmes for certain fisheries.

7	CPC Scientific Observer (para. 44)	Part of the scientific tasks under the data collection regulation ⁴ .	Art. 20 of Regulation (EU) 2019/1154 establishes national scientific observer programmes for pelagic longline vessels fishing for Mediterranean swordfish. National data collection plans include Mediterranean swordfish as one of their priorities for the Mediterranean.	
8	Other requirements (specify) Closure of albacore fishery (par. 12)	The closure period from 1 October to 30 November applies to longline vessels targeting Mediterranean albacore (<i>Thunnus alalunga</i>). A list of vessels has been communicated to the ICCAT Secretariat, under ICCAT Recommendation 21-06.	The closure period is inserted in Annex ID of Regulation (EU) 2024/257 of 10 January 2024 and in Art. 10(1) of Regulation (EU) 2019/1154.	

Inspection Plan

a) CPC's inspection and control (para 13)

Under the EU Common Fisheries Policy (CFP), the primary responsibility for control and enforcement lays with the Member State Authorities.

The European Commission and the EFCA coordinate with the Member States to ensure that the provisions laid down by ICCAT are reflected in the EU and Member States law and fully enforced. The tools in place are explained under point b) below. In addition, the following verification activities are carried out by the European Commission:

i. European Commission inspections

Whilst different in its powers and mandate, the European Commission also has its dedicated unit whose main role is to monitor and evaluate Member States fulfilment of their duties and obligations, including those under the recovery plan of Mediterranean swordfish. The main tools used by the Commission for that are verifications, autonomous inspections and audits.

Although the inspection plan is still subject to change in response to the specificities of the 2024 fishing season, European Commission inspectors will once again be active in 2024.

⁴ Regulation (EU) 2017/1004 of the European Parliament and of the Council of 17 May 2017 on the establishment of a Union framework for the collection, management and use of data in the fisheries sector and support for scientific advice regarding the common fisheries policy.

ii. Vessel monitoring system and Operations team

The team responsible within the European Commission for catch reporting and satellite Vessel Monitoring System (VMS) will monitor in real time the VMS submissions and undertake extensive cross-checks to avoid any potential quota overshoot.

All vessels will be continually monitored by VMS and any interruption in the transmission of VMS data will be immediately followed up with the Member State concerned.

b) Joint international inspection (paras 39-41; Annex 1)

The ICCAT Scheme of joint international inspection as laid down by paras 39-41 and Annex 1 of Rec. 16-05 will be fully implemented by the EU and coordinated by EFCA. EFCA will also coordinate any agreed voluntary exchange of inspection personnel with other CPCs in accordance with the provisions of Resolution 19-17.

i. Specific Control and Inspection Programme

Working under the framework of the ICCAT Scheme of Joint International Inspection and building on experiences from recent years, the EU has currently in place a Specific Control and Inspection Programme (SCIP) to monitor and enforce the implementation of the bluefin tuna management and swordfish recovery plans. This programme is a joint initiative bringing together the resources of the European Commission, EFCA and the Member States involved in the fishery.

ii. Joint Deployment Plan (JDP) for the eastern Atlantic and Mediterranean

In cooperation with the European Commission and Member States, EFCA adopts annually a Joint Deployment Plan (JDP). The EU has established a specific control and inspection programme for certain fisheries. Under these programmes, the decision 2022/32 of EFCA, amending decision n°2018/030, establishes a joint deployment plan (JDP) in the Eastern Atlantic and Mediterranean Sea. This Joint Deployment Plan coordinates the control activities of the Member States. One specific campaign, targets highly migratory species fisheries, including the swordfish fishery. This JDP brings the Specific Control and Inspection Programme into effect and covers all stages of the market chain as well as controls at sea and on land. Under the JDP, EFCA will coordinate in 2024 joint inspections and control activities in the eastern Atlantic and the Mediterranean involving a number of fishery patrol vessels and aircrafts. EFCA also has its own chartered offshore fisheries patrol vessel and aerial surveillance capacity. Whilst the operational strategies and precise areas of operation remain confidential, the general areas covered by the 2024 JDP will be the eastern Atlantic (ICES Areas VII, VIII, IX, X and COPACE 34.1.1, 34.1.2 and 34.2.0) and the Mediterranean (Western, Central and Eastern). The control operations will particularly focus on, but are not restricted to, purse seiners, towing vessels, longliners, farming activities for bluefin tuna and longline fisheries and landings for the Mediterranean stock of swordfish. In 2024, the EU will conduct a minimum of 306 days of control and inspection activities at sea and around 47 days of air surveillance, which reflects the number of days committed for specific campaigns under the JDP.

A JDP Steering Group, composed by representatives of EFCA, the European Commission and the EU Member States, guides the overall strategy of inspection activities and supervises the JDP implementation. The strategy and control priorities are based on an annual risk assessment carried out by the EU Member States under the coordination of EFCA.

All cases of potential non-compliance will be forwarded to the flag State of the vessel/operator concerned and to the ICCAT Secretariat, where required, in accordance with the procedures laid down in the respective dedicated ICCAT recommendations.

The EFCA is also cooperating with EMSA (European Maritime Safety Agency) and FRONTEX (European Border and Coast Guard Agency), each within its mandate, to support the national authorities carrying coast guard functions, by providing services, information, equipment and training as well as by coordinating multipurpose operations. Among the tools used to support these multipurpose operations is the IMS (Integrated Maritime System) service, an application that provides an integrated maritime picture based on the real-time fusion of VMS, Automatic Identification System (AIS) and other maritime related data.

Member States annual Inspection plans

Following Article 26 of Regulation (EU) N° 2019/1154 and in line with paragraph 6 of Rec. 16-05, each EU Member State concerned has developed and submitted a 2024 ICCAT Inspection Plan as part of its National Control Programme for Mediterranean Swordfish. These are extensive programmes containing a description of the resources and inspection strategies that Member States commit to implement within their jurisdiction.

These programmes, as required under the Specific Control and Inspection Programme (see above), include a series of inspection 'benchmarks' consistent with:

- (a) the monitoring of inspections at sea in the EU and international waters on the basis of a minimum percentage of sea inspections on vessels depending on the risk identified for the sector;
- (b) the monitoring of the technical measures and, in particular of the closure periods (for Mediterranean swordfish and Mediterranean albacore); and
- (c) the monitoring of inspections ashore, including inspections at landing and at first sale.

These National Programmes are in full accordance with the conservation and management measures adopted in Recommendation 16-05.

Capacity Management Plan (paras 6-10)

Morocco**Year of Fishing Plan: 2024****1. Introduction**

In accordance with the provisions of Recommendation 16-05, Morocco presents its 2024 Mediterranean fishing plan.

In accordance with the fishing allocations adopted by ICCAT during the intersessional Panel 4 meeting held in Madrid, in February 2017, the 2024 national quota in the Mediterranean area amounts to 896.474 t, i.e. the same quota as for 2023. This quota will be distributed among the different operational sectors targeting swordfish: the artisanal and coastal segment.

In Morocco, Mediterranean swordfish fishing activity is regulated by the provisions of Recommendation 16-05 establishing a multi-annual recovery plan for Mediterranean swordfish and Decree No. 1112-22 of 14 April 2022 on the swordfish (*Xiphias gladius*) fishery development and management plan.

2. Details of fishing plan

In accordance with the provisions of the national fishing capacity management plan, established in Articles 6 to 10 of ICCAT Recommendation 16-05, the maximum fishing capacity authorized to fish Mediterranean swordfish is distributed as follows:

The catches of artisanal fishing boats and coastal fishing vessels are authorised by the Moroccan administration to fish Mediterranean swordfish and are accounted within the quota limit allocated to Morocco by ICCAT.

Artisanal boats fishing swordfish amount to 2,972 boats with no more than 3 GRT and an average engine power of 30 CV. The coastal fleet fishing swordfish amounts to around 219 longliners. These vessels generally measure around 19 m and have an average engine power of 210 CV with less than 150 TJB.

Coastal boats and vessels authorized to actively fish swordfish use handline and surface longline in accordance with the requirements of Rec. 16-05.

In the 2024 fishing season, the Mediterranean swordfish fishing quota is an olympic quota. Fishing vessels catch swordfish until the depletion of the quota allocated to Morocco by ICCAT.

Morocco undertakes to comply with all the provisions of Recommendation 16-05 during the 2024 fishing campaign.

	<i>ICCAT requirement (per Rec. 16-05)</i>	<i>Explanation of CPC actions taken to implement</i>	<i>Relevant domestic laws or regulations (as applicable)</i>	<i>Note:</i>
1	Fleet development plan (para 9)	The list of coastal vessels and artisanal boats catching Mediterranean swordfish are registered in the ICCAT SWO-MD Record.	These vessels are recorded in the national registry of the fleet and hold a fishing license in accordance with the Decree No. 02-92-1026 of 29 December 1992, amended and supplemented and establishing the terms and conditions of issuance and renewal of fishing licenses in the EEZ.	
2	Choice of fishery closure periods (para 11-13)	The closure of the fishing season applies to the period from 1 October to 30 November and during the additional period of one month from 15 February to 15 March.	Decree No. 1112-22 of 14 April 2022 on the swordfish (<i>Xiphias gladius</i>) fishery development and management plan.	
3	Recreational and sport fisheries (para. 21-26)	Currently, Morocco does not operate any recreational and sport fisheries but they could be developed in the coming years.	Dahir No. 1-14-95 of 12 May 2014 enacting Law No. 15-12 to prevent and combat illegal, unreported and unregulated fishing and amending and supplementing Dahir No. 1-73-255 of 23 November 1973 on the maritime fishing regulation.	
4	Allocation of by-catch and detail of the limits by vessel/operation (para 30)	Mediterranean swordfish by-catch taken by other vessels which are not authorised to actively fish Mediterranean swordfish amounts to 0.3% (2.47 t) of the quota allocated to Morocco. This catch shall be accounted and deducted from the quota allocated to Morocco by ICCAT for the 2024 fishing season.	Decree No. 1112-22 of 14 April 2022 on the swordfish (<i>Xiphias gladius</i>) fishery development and management plan.	
5	Recording and communication of catches (para 35-37)	Transmission to the ICCAT Secretariat of quarterly swordfish catches. Communication to the ICCAT Secretariat of the swordfish fishery closure dates (if the quota is reached).		
6	Measures taken to control landings (para 34)	Control at landing ports, fishing sites and fish markets with the obligation of effective weighing of landings of the artisanal and coastal fishing fleet prior to the first sale.		

	<i>ICCAT requirement (per Rec. 16-05)</i>	<i>Explanation of CPC actions taken to implement</i>	<i>Relevant domestic laws or regulations (as applicable)</i>	<i>Note:</i>
		Mandatory system of reporting of catches at landing and monitoring of trade flow through a catch certification scheme. Use of the ICCAT swordfish statistical document programme.		
7	CPC Scientific Observer (para 44)	Vessels over 15 m do not actively fish Mediterranean swordfish. Therefore, national observers will not be deployed.		
8	Other requirements: Minimum size (para. 14-17)	Catching, retaining, transhipping, transferring, landing, storage, selling, displaying or offering to sell Mediterranean swordfish weighing less than 12.6 kg or measuring less than 100 cm Lower Jaw Fork Length (LJFL) is prohibited. Authorised bycatch of maximum 5% in number of Mediterranean swordfish caught below the minimum size. All swordfish less than the minimum size would be recorded and deducted from Morocco's allocated quota.	Decree of the Ministry of Fisheries and Merchant Marine No. 1154-88 of 20 safar 1409 (3 October 1988) establishing a minimum trade size for species caught in Moroccan sea waters as amended and supplemented by Ministerial Decree No. 3935-21 of 24 December 2021.	
9	Other requirements: List of authorised ports for SWO-MD (para 31)	Transmission to the ICCAT Secretariat of CP24 on designated ports for landing Mediterranean swordfish for the 2024 season: - List of designated ports for landing and transhipment of swordfish for the 2024 season: Tanger Ville. - List of ports designated only for landing swordfish for the 2024 season: Al Hoceima, Asilah, Jebba Ksar Sghir, Mdiq, Nador and Ras kebdana.		

Inspection Plan

a) CPC inspection and control (para 13)

Fishery monitoring, control and surveillance practices will be implemented in accordance with national regulation and the provisions of ICCAT recommendations on control and inspection, in particular those stated in Recommendation 16-05. These practices fall under the framework of the national control plan of maritime fishery activities and will focus on measures concerning the following actions:

- Monitoring and control of landings of coastal and artisanal fleets with the obligation of effective weighing before the first sale and compliance with the catch documentation system implemented at national level. This national documentation system allows the control by direct systematic cross-checks between catch reporting at landing and the data of the first sale and allows a supplementary cross-checking tool for the validation of ICCAT statistical documents.
- VMS monitoring of fishing vessels is conducted by the FMC of the Fisheries Department with an online availability of real time position data for the Regional Administration of Maritime fisheries (Maritime Fishery Delegations).
- Implementation of a procedure for communication and recording of fishery information, in particular, through the implementation of an ICCAT statistical document programme.
- Compliance with the provisions regarding port inspection measures of foreign vessels and, compliance with the international commitments of Morocco with respect to the International Commission for the Conservation of Atlantic Tunas (ICCAT).

Sea surveillance is also ensured by other authorities empowered within the framework of assignments conferred by national regulations.

b) Joint international inspection (para 39-41; Annex 1)

Morocco does not account for catching vessels that participate in fishing activities directed at Mediterranean swordfish outside the EEZ (international waters).

Therefore, Morocco will not deploy an inspection vessel.

Capacity Management Plan (paras 6-10)

Quota			982.26	952.79	924.2	896.47	896.47	896.47	896.47
Adjusted quota (if applicable)			933.15	930.79	912.9	894.00*	894.00*	894.00*	894.00*

* An amount of 0.3% of the quota, i.e. 2.47 t, deducted from the national quota, is set aside for potential quota overruns and potential dead discards of swordfish.

Tunisia**Year of Fishing Plan: 2024****1. Introduction**

This document is hereby presented and provides detailed information on the 2024 swordfish management plan, in accordance with the Rec. 16-05 which foresees a multiannual recovery programme for swordfish in the Mediterranean.

Tunisia accounts for an artisanal fishery specialised in swordfish catches, which operates with coastal vessels that measure between 3.7 and 19 m, including a small part (10%) measuring over 15m. The total number of these vessels amount to 709 vessels.

In Tunisia, swordfish fishing is regulated by a set of legislative and regulatory provisions, including:

- The provisions of the International Convention for the Conservation of Atlantic Tunas (ICCAT) and in particular Rec. 16-05, establishing a multi-annual recovery programme for swordfish in the Mediterranean.
- Law No. 94-13 of 31 January 1994 on fishing activities.
- Decision of the Minister of Agriculture of 28 September 1995 regarding the organization of fishing activities.
- Decision of the Minister of Agriculture, Hydraulic Resources and Fisheries of 22 April 2019 regarding the organization of the swordfish fishery.

The exploitation of this fishery resource is subject to the granting of a fishing licence. subject to a coastal fishing authorisation issued by the competent authority. This authorisation covers a variety of species, caught by selective gear, including particularly, longline. Fishermen undertake to strictly comply with fishery closure periods, avoiding targeting swordfish during these temporary windows. The majority of the swordfish caught is destined to the local market.

In addition, specific regulations have been adopted, prohibiting fishing for swordfish during three consecutive months from 1 January to 31 March each year. The minimum regulatory size was established at 100 cm, calculated from the end of the lower jaw to the posterior tip of the shortest caudal ray, the minimum size of hooks is 7 cm and the number of authorised hooks per fishing vessel is limited to 2500 units as established by Ministerial Decree of 22 April 2019. For 2024, the swordfish fishing quota allocated to Tunisia is 865.37 t.

2. Details of fishing plan

Fishing for swordfish is conducted by pelagic longline and management of this activity is regulated in accordance with the provisions of ICCAT Rec. 16-05 and the domestic legislation in force. Tunisia's allocated quota, established at 865.37 t, will not be distributed individually by each vessel, and will be applied to the coastal fishing fleet registered on the ICCAT vessel record.

The fishing season will be closed when the national quota is exhausted. A circular will be distributed to all the competent services, informing on the prohibition of fishing, landing, transporting and processing of swordfish.

	<i>ICCAT requirement (per Rec. 16-05)</i>	<i>Explanation of CPC actions taken to implement</i>	<i>Relevant domestic laws or regulations (as applicable)</i>	<i>Note</i>
1	Fleet development plan (para 9)	<p>The swordfish fishing programme is established to ensure strict compliance with Tunisia's allocated quota with the relevant provisions contained in national legislation and regulation and the guidelines issued by ICCAT, in particular Recommendation 16-05.</p> <p>Since the start of this programme, Tunisia has strengthened its efforts regarding the regional authorities to update the record of fishing vessels authorised to target swordfish leading to a revision of the potential fleet size. The number of this potential fleet has been revised from 403 to 872.</p> <p>In addition, the number of these vessels has been adjusted to 709 in 2023.</p>	<p>Law No. 94-13 of 31 January 1994 on fishing activities.</p> <p>Decree No. 99-2130 of 27 September 1999 establishing the composition and functioning modalities of the advisory board for the organization of fishing activity, as amended by Law No. 2004-2138 and its amendments.</p> <p>Decree No. 99-2129 of 27 September 1999 establishing the composition and functioning modalities of the advisory board issuing authorisations for construction and import of fishing vessels and its amendments.</p>	
2	Choice of fishery closure periods (para 11-13)	Fishing for swordfish is prohibited from 1 January to 31 March each year.	<p>Law No. 94-13 of 31 January 1994 regarding fishing activities and its amendments.</p> <p>Decision of the Minister of Agriculture of 22 April 2019 regarding the organization of the swordfish fishery.</p>	
3	Recreational and sports fisheries (para 21-26)	No sport or recreational fisheries will be permitted.	Law No. 94-13 of 31 January 1994 regarding fishing activities and its amendments.	
4	Allocation of bycatch and detail of the limits by vessel/operation (para 30)	<p>Tunisia has an artisanal swordfish fishery which operates with coastal vessels using different gear types, including longline.</p> <p>The right to access this resource is subject to a coastal fishing authorisation which is issued by the competent authority.</p> <p>This authorisation is not specific to swordfish since</p>	<p>Law No. 94-13 of 31 January 1994 regarding fishing activities and its amendments.</p> <p>Decision of the Minister of Agriculture of 22 April 2019 regarding the organization of the swordfish fishery.</p>	

	<i>ICCAT requirement (per Rec. 16-05)</i>	<i>Explanation of CPC actions taken to implement</i>	<i>Relevant domestic laws or regulations (as applicable)</i>	<i>Note</i>
		this segment of the fleet targets several species stocks using different types of selective gear, including longline, and no individual quotas are distributed. However, the fishers abide by the fishery closure periods, reglementary size and number of hooks per fishing vessel.		
5	Recording and communication of catches (para 35-37)	Number of days at sea of the vessels (small boats) actively fishing swordfish does not exceed one week. The master of the fishing vessel records the information on fishing operations in the logbook. A copy of this logbook is transmitted to the competent authority on landing.	Law No. 94-13 of 31 January 1994 regarding fishing activities.	
6	Measures taken to control landings (para 34)	In-port inspections are carried out by the fishery services that are responsible for controlling swordfish landings, fishing gear and onboard documents.	Law No. 94-13 of 31 January 1994 regarding fishing activities and its amendments.	
7	CPC Scientific Observer (para 44)	Swordfish fishing vessels over 15 m, like all the other coastal fishing vessels, do not only target swordfish. As such, deployment of a scientific observer onboard these vessels is not envisaged.		A scientific monitoring programme of the swordfish fishery has been launched. It is based on the collection of scientific data on landing in the main production ports of production.
8	Other requirements (specify)			

Inspection Plan

a) *CPC's inspection and control (para. 13)*

During the swordfish fishery closure period, at-sea inspections will be conducted by certified national officers, i.e. fisheries officers, agents of the national maritime guards, officers of the national navy and the

representatives of customs officials.

To guarantee increased monitoring, joint control campaigns between the fishery authorities and other bodies (national maritime guard, national navy, ministry of trade, municipalities, and customs) will be strengthened. These control missions, specifically planned during the closure period, will be conducted at fishing ports and commercial areas to ensure strict compliance with the regulations established.

b) Joint international inspection (paras. 39-41; Annex 1)

Catching vessels do not carry out swordfish directed fishing activities but operate in a versatile way. In fact, Tunisia does not envisage deployment of an inspection vessel exclusively dedicated to this fishery in the Convention area.

Capacity management plan (paras 6-10)

Table attached.

Türkiye

Fishing Plan Year: 2024

1. Introduction

Mediterranean swordfish quota of 378, 69 t pertinent to Türkiye will be assigned for utilization by 123 SWO-MD fishing vessels with special fishing permits for the year 2024. A % 10 of the quota will be assigned for coastal artisanal fisheries. There will be no activities envisaged for sports and recreational fisheries targeting SWO-MD. Distribution of the authorized number of fishing vessels by gear type in 2024 is provided below:

Mediterranean swordfish fishery will be regulated through the updated Ministerial Notification Regulating Commercial Fisheries.

2. Details of fishing plan

Details of all fishing gear groups that catch Mediterranean swordfish, including the total number of vessels in each group, is given in the attachment.

The individual quotas shall be allocated in accordance with criteria developed domestically in consideration of past performances of fishing vessels as well as regional and socio-economic aspects of coastal artisanal fisheries in Türkiye.

A reporting system that would require fishermen to record and report to the Ministry of Agriculture and Forestry (MoAF) following each landing within 48 hours will be mandatory. The reporting system shall involve regular landing controls and checks will be implemented to monitor and control catches and to ensure vessel and gear group quotas are respected.

	<i>ICCAT Requirement (per 16-05)</i>	<i>Explanation of CPC actions taken to implement</i>	<i>Relevant domestic laws or regulations (as applicable)</i>	<i>Note</i>
1.	Fleet development plan (para 9)	N/A	N/A	
2.	Choice of closed Fishing Seasons (paras 11-13)	Closed Season: 15 Feb – 15 March 1 October – 30 November In accordance with the paragraph 9 of the ICCAT Rec. 21-06, closure periods for Mediterranean albacore will be implemented as “from 1 October to 30 November” and “from 15 February to 15 March”.	Ministerial Notification Regulating Commercial Fisheries	
3.	Recreational and sports fisheries (paras 21-26)	No specific quota is assigned for recreational and sports fisheries.	N/A	

	<i>ICCAT Requirement (per 16-05)</i>	<i>Explanation of CPC actions taken to implement</i>	<i>Relevant domestic laws or regulations (as applicable)</i>	<i>Note</i>
4.	Allocation for by-catch and detail of limit per vessel/operation (para 30)	Maximum by-catch limit per vessel and per fishing operation shall not be more than 5 individuals. The by-catch in question shall be deducted from Türkiye's TAC.	Ministerial Notification Regulating Commercial Fisheries	
5.	Catch recording and reporting (paras 35-37)	Authorized SWO-MD catching vessels above 15 m LoA shall record, report and communicate to the Ministry (either by electronic or bound logbooks or in other means) weekly catch reports on relevant details of SWO-MD catches (spatial, temporal and biological details) following any given fishing operation without delay. Ministry shall submit a compilation of weekly catch reports to the ICCAT Secretariat on a quarterly basis in line with the required format.	Ministerial Notification Regulating Commercial Fisheries	
6.	Measures taken to control landings (para 34)	Ministerial inspectors shall perform regular inspections and checks at landing spots to ensure the validity of catches and level of compliance to individual quotas, by-catch limitations and other rules.	Ministerial Notice and Circulars	
7.	CPC Scientific Observer (para 44)	Scientific observers shall be deployed on at least 5% pelagic longliners over 15 meters LoA. Additionally, Ministerial inspectors accompanied by scientific observers shall perform regular checks at the most busy and operational landing spots to account for a 10 % of the total landings points, in a way to improve data collection and sampling.	Ministerial Notification, Notice and Circulars	

	<i>ICCAT Requirement (per 16-05)</i>	<i>Explanation of CPC actions taken to implement</i>	<i>Relevant domestic laws or regulations (as applicable)</i>	<i>Note</i>
8.	Other requirements (specify)	<p>Technical Regulations</p> <p>-The catch of swordfish smaller than 125 cm is prohibited.</p> <p>-It is mandatory for the fishing vessels to catch swordfish obtain "Fishing Permit" from the provincial directorate issuing vessel's license. Applications by the fishermen to acquire a special fishing permit for swordfish is subject to some technical criteria. When an application made is approved by the Ministry, the special permit information is simultaneously recorded in the Fisheries Information System (FIS) operated by the Ministry.</p> <p>-When longlining for tuna and swordfish only hooks no. 1 and no. 2 with a gape width smaller than 2.8 cm is permitted.</p> <p>During the closed season, SWO-MD fishermen engaged in other types of coastal fisheries, trawling, tourism and/or aquaculture activities.</p> <p>In accordance with Para 12 of Rec. 16-05 Türkiye will implement the closure periods for the longline vessels targeting Mediterranean Albacore as from 1 October to 30 November and from 15 February to 15 March.</p>	Ministerial Notification, Notice and Circulars	

Inspection Plan

a) CPC's inspection and control (para 13)

Inspection and controls have been the major components of the activities of MoAF for ensuring the efficiency of the closed season and size regulations set for the Mediterranean Swordfish. The inspection activities, which are still ongoing, have been concentrated at most potential fishing grounds, landing points, retail and wholesale markets. Ministerial inspectors shall perform regular inspections and checks at landing spots to ensure the validity of catches and level of compliance to individual quotas, by-catch limitations and other rules. Each CPC will provide information on its plan for inspection and control of closed season.

In this context, 301.87 kg of SWO-MD have been seized in 2023 in consequence of the inspections conducted by MoAF inspectors at several coastal provinces. A total of 60.9 kg of SWO-MD were seized by Ministerial inspectors previously in 2022.

In accordance with the relevant provisions of ICCAT Rec. 16-05; a list of designated landing points for SWO-MD has been made available and reported to ICCAT on 13 March 2024.

In 2002 and 2003, EU and ICCAT enforced a recommendation prohibiting the usage of drift-nets in the Mediterranean. Afterwards, drift-netting in Türkiye was also banned in 2006. Subsequently, Türkiye announced its position for elimination of modified driftnet usage with the ICCAT Circular # 3225/2010. Accordingly, usage of all modified drift-nets has been prohibited as from 1 July 2011. Accordingly, all fishing vessels with the modified drift-nets have gone under obligation to shift their fishing gears in accordance with provisions of Revised Notification No. 2/1 Regulating Commercial Fishing. MoAF continued its efforts to promote the usage of more selective fishing methods and fishing gear by the majority of Turkish swordfish fishermen, with several regional training activities.

b) Joint international inspection (paras 39-41; Annex 1)

Inspectors from Turkish Coast Guard have been trained to actively participate to inspections for SWO-MD in the context of ICCAT Joint Scheme of International Inspection.

Türkiye plans to participate to the ICCAT Joint Scheme of International Inspection in 2024 with 79 Turkish Coast Guard Command (TCGC) Inspection Boats, 17 air control assets (planes/helicopters) and 446 inspectors. Additionally, Turkish Naval Forces Command intends to join the inspection scheme of 2024 through assigning 13 inspection vessels and 112 inspectors during the 2024 BFT-E fishing campaign. Due to logistical reasons, envisaged numbers of inspection boats and inspector staff may be subject to some changes subsequently.

Furthermore, an additional inspection vessel - namely AKDENİZ ARAŞTIRMA 1- that has been assigned by MoAF will also contribute to the activities under ICCAT Scheme of Joint International Inspections in the region.

Based on a risk analysis approach, the locations where the fishing vessels were mostly concentrated during previous seasons are planned to be focused on for 2024.

The means of at-sea inspections shall be deployed SWO-MD fishing grounds which are determined based on 2023's risk assessment data.

Capacity Management Plan (paras 6-10)

SWO-MD Vessel Fleet Capacity Management Plan is attached below.

SWO-MD Vessel Fleet	Choose one		Total fleet (vessels)
